

The image is a composite graphic. On the left, under the heading "Functional Lateralization", are four brain scan images showing functional activity in different regions, labeled "L" and "R". An arrow labeled "Predicts" points from these scans to the right. On the right, under the heading "Neurostimulation", are two brain scan images showing a specific area highlighted in red and blue. Below this, a diagram shows a brain with two electrodes on opposite sides, labeled "Positive Responder" and "Negative Responder", with a central label "Mechanism". To the right of the brain diagram is a stylized illustration of a brain with colorful neural connections. At the top right, the text "ADVANCED SCIENCE" is prominently displayed in a bold, white font, with "Open Access" written below it. The background of the right side features a grid pattern with small human figures.
